MODULAR TISSUE EMBEDDING CENTER

EC 500

FOR PARAFFIN BLOCKS

All elements in the modular paraffin embedding center are designed to achieve maximum efficiency and operator comfort

WORKING AREA

Innovative design and functionality for flexible working method

The heated working surfaces are thermally insulated towards the operator and ergonomically shaped. Spacious, heated working area with a non-glare white LED illumination with adjustable intensity.

Adjustable paraffin dispenser paddle to accommodate Mega and Super Mega cassettes. Built-in wax trimmer. Urgent biopsies can be embedded any time even in "standby mode".

STORAGE AND RESERVOIR

Ergonomics and functionality for better processing

Two storages of large capacity, independently heated, for molds and cassettes. The paraffin reservoir has a capacity of 5 liters to ensure continuous operation during high workflow. Any surplus paraffin is guided into waste drawers, accessible from the front, which are easily emptied.

CONTROL PANEL

Versatile configuration for enhanced user-friendliness

Clear, user friendly keyboard for easy programming and setup of working parameters.

An energy saving function is incorporated, using an automatic timer that turns on/off via calculations based on the individual pre-heating times.

DISPENSING CONSOLE EC 500-2
