SERIAL SEQUENTIAL STIMULATION

The "3S" program list includes 12 parameter combinations. The "3S" programs are characterized by a delay activation of the channels 3 and 4 compared with the channels 1 and 2. The Serial Sequential Stimulation permits to stimulate the musculature in kinetic chain thanks to the differentiated activation times of the muscular groups involved.

ACTION NOW

The Action Now program list includes 7 parameter combinations. The Action Now programs are particularly useful to link and synchronize the electric stimulation with a voluntary action.
