CelCulture® CO2 Incubators

CO₂ incubators are widely used in scientific research to grow and maintain cell cultures.

Typical fields of application include tissue engineering, in vitro fertilization, neuroscience, cancer research, in vitro fertilization for culture media preparation, and other mammalian cell research applications.

Sleek, reliable and intuitive, Esco Medical's CelCulture[®] CO₂ incubators provide complete sample protection that brings your scientific dreams one step closer to reality

*Not applicable for 50 L model (including the top, back and bottom plenum)

CelCulture[®] – Stainless steel interior supported by a globally accepted technology.

Shelving

- Perforated shelving to improve uniformity
- •Anti-tip
- Stainless steel
- Built-in grip
- Dismantles without tools for easy cleaning

Duct Work

- Directs air flow for rapid recovery and excellent uniformity
- Easily removed for cleaning

Water Pan

- Precisely heated by base heater to provide high humidity
- Gentle airflow over water surface accelerates humidity recovery

FEATURES:

Smartsense[™] Microcontroller Interface

Intuitive, fully equipped control and monitoring system.

Quality Esco Construction

- Electrogalvanized steel with white oven-baked epoxy polyester antimicrobial powder-coated finish.
- External surfaces are powder coated with Esco ISOCIDE™ to eliminate 99.9% of surface bacteria within 24 hours of exposure.
- Ensures a healthier, safer and cleaner lab environment.

ULPA Filter*

- 99.999% efficient, superior to conventional HEPA filters.
- Filters air continuously.
- Chamber returns to ISO Class 5 cleanliness in 11 minutes upon door closing to prevent contamination

Sample Port

Allows direct measurement of chamber atmosphere such as temperature and CO_2 concentration.

Blower*

Gentle airflow in chamber improves recovery and uniformity.

Inner Door Kit

- Divides the incubator into different chambers.
- Minimizes recovery times and contamination risk.

CelCulture[®] CO₂ Incubators

Faster Temperature and CO,/O, Recovery Time

CelCulture[®] CO₂ Incubators are equipped with a sophisticated firmware and robust hardware components to facilitate faster recovery time for temperature, CO₂, and O₂.

Fully redesigned sensor location to facilitate for a faster recovery of temperature inside the chamber. Infrared sensor monitors and controls CO_2 inside the chamber, while O_2 sensor maintains the suitable oxygen concentration for optimal incubation.

Maintaining Low Levels of Oxygen for Optimal Embryo Growth

The Suppressed O_2 Model of the CelCulture[®] with its Zirconia O_2 sensor ensures accurate control and monitoring of hypoxic conditions inside the chamber

Inner Door Kit Feature

A standard feature that helps to hasten the recovery of parameters and prevent cross-contamination. The 50 L chamber is divided into two sections while the 170 L has 4 sections. The 240 L model can either have 4 or 6 sections. Each section has a dedicated door panel.

Access Ports in Key Positions

Access ports to provide an easy route for calibration and validation of the chamber parameters

- two access ports for 50 L (one at the inner glass door and one at the rear of the incubator)
- three access ports for 170 L and 240 L (one at the inner glass door and two at the rear of the incubator)

Maximum Protection Against Contaminants

- 90°C moist heat decontamination cycle
- Gas filters
- Isocide[™] antimicrobial coating

Efficient Filtration System

It makes use of ULPA filters which is 99.999% efficient, and superior to conventional HEPA filters allowing continuous air filtration. The chamber returns to ISO Class 5 cleanliness in 11 minutes upon door closing to prevent contamination.

Options & Accessories

CO₂ Back up

This option allows two tanks of CO_2 to be connected to the incubator. It will automatically switch from the primary tank to the secondary tank when low gas pressure is detected on the primary tank.

N₂ Back up

This option allows two tanks of N_2 to be connected to the incubator. It will automatically switch from the primary tank to the secondary tank when low gas pressure is detected on the primary tank.

2-Stage gas regulator for CO₂/N₂

Used to reduce the pressure from the tank to the incubator.

Roller Base

With casters for mobility of your incubators.

Floor Stand with Adjustable Feet

Nominal range of 180 mm to 250 mm (7.1" to 9.8")

Floor Stand with Casters

Support stand raises the incubator to a height of 700 mm (27.6") above the floor

Electronic Gas Analyzer

The electronic analyzer allows the measurement of CO_2 concentration, O_2 concentration, relative humidity and temperature (temperature probe already included).

Humidity Display

For monitoring of the Relative Humidity inside the chamber. Works from –70°C to 180°C

Options & Accessories

Analog Output

Used for connecting the incubator to an output analog signals representing the temperature, CO_2 and O_2 gas concentration and relative humidity.

Additional Stainless Steel Shelf (for SS Chamber)

Maximize your incubator space by adding more shelves. Can add 1 extra shelf for 50 L model, 3 more shelves for 170 L and 240 L models.

Chart Recorder Easy-to-read graph of data vs. time

Voyager Software Kit

PC-based software for remote monitoring, datalogging and programming.

Infertility is a problem that has a significant social, psychological, and economic impact on afflicted individuals and couples. It is a global concern that knows no race or creed. It has been estimated that 1 in 6 couples struggle with infertility at least once in their lifetime.

Esco Medical is one of the divisions of the Esco Lifesciences Group. We provide innovative technological solutions for fertility clinics and laboratories. We aim to become the leading manufacturer of high-quality equipment such as long-term embryo incubators, ART workstations, anti-vibration tables, and time-lapse incubators.

Our products are designed with the Silent Embryo Hypothesis as a guiding principle. The Silent Embryo Hypothesis states that the less disturbed an embryo can remain, the better its developmental potential will be. Most of our products are designed in Denmark and made in the EU. Our primary focus is to increase pregnancy success rates and patient satisfaction.
